BULBS, PLANTS, ETC.

With Directions for the Culture and Management of Bulbous Roots.

Flowers from Bulbous Roots.

HENRY A. DREER,

SEEDSMAN AND FLORIST,

714 Chestnut Street, Philadelphia, Pa.

NURSERIES AND SEED FARM RIVERTON.

TO OUR CORRESPONDENTS.

WE again take pleasure in offering our revised and illustrated CATALOGUE OF BULBS, PLANTS, SMALL FRUITS, ETC., for the Autumn of 1881. The list will be found to embrace all the leading and most desirable varieties, it being our constant aim to introduce and send out only such as have deserving merits. The Hyacinths will be found worthy of special attention, having been personally selected to secure the essential qualities of size, brilliant colors and free blooming. The single varieties are especially recommended for forcing into early bloom in glasses. The collection of Tulips should not be overlooked; their exceedingly brilliant colored flowers are attractive in every garden or house.

QUALITY OF BULBS.—The past season in Holland having been favorable to the growth and development of the Hyacinth, etc., our customers may depend on receiving the very best roots obtainable. We import direct from the best growers in Holland, which is determined by personal visits to their establishments. Our first and largest importation, which we expect about September 10, is from growers doing no business in America; this gives us the benefit of the first execution of our orders, and the first choice from their very large stock, while they are obliged to ship our goods at least a fortnight before their home business commences. These importations are entirely different from the refuse sent out by growers having no home trade, who put up their goods in assorted cases for auction, or offer them by the case as cheap, but which are in reality dear, as they are rarely true to name or color, and frequently prove unsound. Many sorts, such as Lilies, Gladiolus and Greenhouse bulbs, are grown at our Nursery, and are of fine quality.

BULBS BY MAIL OR EXPRESS.—All the Bulbs noted in this Catalogue are delivered FREE by *Mail* or *Express* to any part of the United States at the catalogue prices per piece, dozen and hundred, excepting Hyacinths, Crown Imperials, Lilies, Gladiolus and Tuberoses; for Hyacinths, \$1.75 per hundred, Crown Imperials and Lilies, 25 cents per dozen, Gladiolus and Tuberoses, \$1.00 per hundred, additional, should be remitted to partly cover the expense of delivering, and insuring prepayment.

PLANTS BY MAIL, POST-PAID.—No order under one dollar will be filled, and only small plants can be sent. By our compact and light system of packing we send to all parts of the country in perfect condition; it is, however, always more satisfactory, when strong plants are desired and a quantity wanted, to forward by express at the purchaser's expense. Our plant department is deserving of notice. We are continually receiving, propagating and sending out all the new things as fast as they appear in this country and Europe, at the lowest possible price.

TERMS.—All orders from unknown correspondents must be accompanied by POST-OFFICE ORDER, DRAFT or PRE-PAID EXPRESS REMITTANCE—Postage Stamps can be remitted when currency cannot be obtained—or instructions to Collect on Delivery, by Express. Collection charges to be paid by the purchaser. We decline sending Bulbs, Plants, or perishable goods C. O. D. to distant parts, unless the order is guaranteed by your Express agent, or a part remittance.

A LIBERAL DISCOUNT to all purchasers ordering in quantity, especially when the selection of varieties is left to our choice, and shipped at the expense of the purchaser.

CAUTION.—Do not buy of travelling agents or pedlers. Some of these impostors have represented themselves as our agents.—Beware of them. We employ no travelling agents. Send direct to head-quarters, and then you are sure of obtaining a genuine article at a moderate price.

ADDRESSES.—Be particular to write your name distinctly, with Post-Office, County and State, also nearest Express Office, when convenient to receive them in that way. Please notify us of any change of permanent address, in order that we may be able to forward our catalogues with regularity. Address,

HENRY A. DREER, 714 Chestnut Street, Philadelphia, Pa.

WILLIAM F. DREER. WILLIAM H. SMITH.

HARDY SPRING FLOWERING BULBOUS ROOTS.

THEIR NATURE AND TREATMENT.

PLANTED FROM OCTOBER TO DECEMBER.

Bulbs belong to a particular division of the vegetable kingdom; they are all, with scarcely a single exception, very ornamental, and hence desirable for the very large size of their flower in proportion to the entire plant, and for the brilliancy of their colors. By far the greater number of bulbs flower in the spring, and produce their flower stems immediately after they begin to grow; and shortly after they have flowered they cease growing and remain dormant and without leaves during the remainder of the year; hence, almost all bulbs require to be planted in the autumn-a fact which most amateurs are apt to overlook, and frequently send their orders out of season. They require a free, dry and somewhat rich soil, into which the roots may penetrate freely. A bulb is essentially a bud, and contains within itself the germs of the leaves and flowers which are to be produced the following season; thus, in one sense, they are of more easy culture than any other class of plants, because the germ being previously formed, and the nourishment being provided in the body of the bulb, it is only necessary to supply heat and moisture to cause them to develop; this is fully exemplified in the Hyacinth, Narcissus, Crocus, early Tulip, and some other bulbs, which can be flowered when placed over water in glasses or in wet moss. The Hyacinth is the especial favorite for forcing in glasses, and full directions for their management will be found under the head of Hyacinths.

SOIL.—The proper compost for Hyacinths, Tulips, Crown Imperials, Iris, Ranunculus, Anemones, Crocus, and many other bulbs, is the following: one-third sand, one-third well-rotted cow manure, and one-third good garden mould.

TIME OF PLANTING.—The preferable season for planting all hardy bulbs is from October to December; but they can be set out at any later time, so long as the bulbs remain sound and the ground is not frozen.

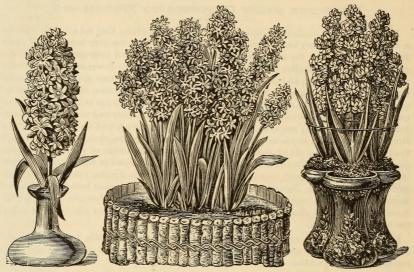

DEPTH AND DISTANCE.—Hyacinths, large Lilies and Pæonias, should be planted at the depth of four inches; Crown Imperials and Polyanthus Narcissus, five inches; Tulips, Double Narcissus, Jonquils and Colehicums, three inches; Bulbous Iris, Crocus, small Fritillarias, Gladiolus Byzantinus and Snowdrops, two inches; Ranunculus and Anemones, one inch; always measuring from the top of the bulb. The rows should be about ten inches apart, and the bulbs to be placed from four to eight inches apart in the rows, according to their size. As cold freezing weather approaches, give the bed a good covering of leaves, hay, old manure or tan, to prevent the frost from penetrating to the bulbs. Early in the spring, as soon as the shoots are pushing through it, the covering should be carefully removed, and the earth slightly stirred with a garden fork.

TAKING UP AND PRESERVING.—Take up Bulbous Roots about a month after the blossom is completely ower, in the following manner: when the plants put on a yellowish decayed appearance, take up the roots, cut off the stem and foliage within an inch of the bulbs, but leave the fibres, etc., attached to them; spread them in an airy room for two or three weeks to dry, after which wrap each root carefully in paper (as the air is very injurious to bulbs), or cover them with perfectly dry sand.

Bulbs intended for blooming in pots during the winter season should be planted during the months of October and November, and be left exposed to the open air (covered with a few inches of tan or soil) until they begin to freeze, and then be placed in the greenhouse or a room where fire is usually made. They will need, occasionally, moderate watering until they begin to grow, when they should have an abundance of air in mild weather, and plenty of water from the saucers whilst in a growing state; and should be exposed as much as possible to the sun, air and light to prevent the leaves from growing too long or becoming yellow.

The Hyacinth.

Among hardy bulbs the Hyacinth stands, deservedly so, foremost on the list; it is not only a general favorite for the garden, but has become exceedingly popular as a winter flower, from the facility with which it may be forced into bloom, either in pots or glasses filled with water. Nothing can be more delightful, either for beauty or fragrance, than a stand of these lovely flowers, in a parlor or drawing-room during the winter months.

TYE'S GLASS.

HYACINTHS IN FERN DISH.

TRIPLET GLASS.

METHOD OF BLOOMING HYACINTHS IN THE WINTER SEASON IN GLASSES.

For this purpose, single Hyacinths and such as are designated early among the Double, are to be preferred. Single Hyacinths are generally held in less estimation than Double ones; their colors, however, are more vivid, and their bells, though smaller, are more numerous; some of the sorts are exquisitely beautiful; they are preferable for flowering in winter to most of the Double ones, as they bloom two or three weeks earlier and are very sweet scented.

Hyacinths intended for glasses should be placed in them during October and November, the glasses being previously filled with pure water, so that the bottom of the bulb may just touch the water; then place them for the first three or four weeks in a dark closet, box or cellar, to promote the shooting of the fibres, which should fill the glasses before exposing them to the sun, after which expose them to the light and sun gradually. If kept too light and warm at first, and before there is sufficient fibre, they will rarely flower well. They will bloom without any sun, but the colors of the flowers will be inferior. To insure vigorous growth a favorable exposure to light and occasional fresh air, when mild, are essential. The water should be changed as it becomes impure; draw the roots entirely out of the glasses, rinse off the fibres in clean water, and wash the inside of the glass well. Care should be taken that the water does not freeze, as it would not only burst the glass, but cause the fibres to decay. Whether the water is hard or soft, is not a matter of much consequence—soft is preferable—but must be perfectly clear, to show the fibres to advantage.

Avoid a low water mark in the glasses by keeping it to a level with the base of each bulb. Never place the glasses upon a mantel-piece or shelf within the influence of fire heat during the process of growth. To stimulate and strengthen the growth, dissolve a pinch of sulphate

of ammonia occasionally in the water after the bulbs are exposed to light.

THE TREATMENT OF HYACINTHS IN POTS.

For the growth of Hyacinths in pots, the most favorable planting season for early bloom is September, and, for a succession, at intervals up to January. The size of pots is regulated by the space or convenience for placing them; when limited, and a rich massive effect is wished for, those of six or eight inches in diameter are recommended, in which three or four bulbs may be placed, but where more convenience is had, a succession of single or double bulbs in smaller pots may be admitted—two bulbs in each are very effective, and generally

preferred; the colors of such may be regulated according to taste. In potting, use the soil as already described; each bulb should remain one-third above the surface of the soil, and the base of each bulb should rest upon a strata of clean river sand. After potting place them where intended to remain, upon a dry surface of ashes or sharp gravel, in the rotation of their intended periods of bloom, each later potting plunged beyond the previous ones, and thus arranged, water the whole well to inbed the bulbs firmly within the soil, allowing them to remain until the bulbs and surfaces are again dry, for one or two days; then cover the whole over to the depth of three or four inches with half-dried tan, sawdust, sand or soil, for six or eight weeks, in which position the preparatory root-growth is made, necessary to a vigorous development of their flowerscapes. After the period adverted to, less or more, the first potted bulbs may be taken up, the soil and sediment carefully brushed off, and removed to a gentle hot-bed, or a warm genial greenhouse or room where the bloom will progressively expand, care being taken to screen the leaf-growth made in darkness for a few days. A short difference of a week or fortnight between the periods of potting will produce a corresponding difference in the periods of bloom. They are very effective when massed in Fern Dishes, Window Boxes, or in pots ten inches in diameter and six inches deep, either all of one color or assorted, according to fancy.

DOUBLE NAMED HYACINTHS.

For Beds and Border culture. Those marked early are suitable for growing in pots and glasses, and force very readily, but are not so early as the single varieties, which are preferable for forcing in glasses.

Size of Bulbs. Some of the most beautiful varieties of Hyacinths, especially among the double-flowering sorts, produce but small bulbs; but the small size of the bulb does not

diminish or increase the size of the spike or the beauty of the flowers.

Semiramis. Rosy white.
Vesta. Rosy white.
Charles Dickens. Lilac, violet stripe.
L'amie du cœur. Deep violet.
Mimosa. Deep violet, to black.
Regulus. Light blue, azure striped.

UNNAMED OR MIXED HYACINTHS.

The following varieties are for out-door culture, in beds, groups, borders, or for florists' cut flowers, grown in pots. Each color embraces many shades, from the lightest to the darkest; purchasers can have them either in double or single varieties, put up in separate colors, or all mixed together, as may be desired.

15 cents each. \$1.50 per dozen. \$9 per hundred.

of various shades, double. Red and pink, Red and pink, Blue and porcelain, White and rosy white, "

of various shades, single. Blue and porcelain, White and rosy white, Yellow,

Double Yellow, 25 cents. \$2.50 per dozen. \$16 per hundred.

EARLY ROMAN HYACINTHS.

The earliest for forcing, for florists' cut flowers, with small spikes of single white bells, bulbs usually producing several spikes. 15 cents. \$1.25 per dozen. \$8.50 per hundred.

MIXED MINIATURE HYACINTHS.

This variety is of interest to those who desire to cultivate them; the bulbs, being small, still produce fine spikes of flowers of various shades and colors, and can be grown in all the ways we recommend for other Hyacinths. 15 cents. \$1.25 per dozen.

MUSK AND OTHER HYACINTHS.

This class is for garden culture, and fine for edging; also adapted for pot culture.

BACH Belgicus alba. White 05 Belgicus cœrulea. Blue. 0.5 Botryoides alba (Grape). 10 White ..

Muscaria minor (Musk). Blue and yellow; sweet.... Plumosus (Feathered). Purplish blue. Fine for

dant, bell-shaped flowers. This plant is rapidly gaining popularity. 25 cts. \$2.50 per dozen.

ROMAN HYACINTH

HYACINTHS IN PACKAGES.

The following are put up in packages, with names and colors marked, and are lower in price than the same quality of roots when selected from the catalogue. They are all choice free-blooming varieties, for growing in glasses, pots, or garden culture.

Packages Nos. 6, 7, and 8 are fine unnamed varieties, with colors marked.

Contains 6 double. No. 1.—\$1.25. Bouquet tendre. Dark crimson. Czar Nicholas. Delicate rose. Bonquet Car Nicholas. Delicate rose.

Czar Nicholas. White, violet centre. White, rose centre. La virginite. General Antink. Blue, shaded violet. Lord Wellington. Deep blue, lilac stripe.

No. 2.-\$1.50. Contains 6 double. Bouquet royale. Rose, dark centre. Noble par merite. Dark rose, pink stripe. Jenny Lind. White, with purple eye. Prince of Waterloo. Pure white. Blocksberg. Porcelain blue. Mignon van Drijfhout. Dark blue.

No. 3.-\$1.25. Contains 6 single. Amy. Dazzling carmine. Emmeline. Pink. Mrs. Beecher Stowe. Pure white. Vesta. Rosy white. Charles Dickens. Lilac, violet stripe. Regulus. Light blue, azure stripe.

No. 4.-\$1.50. Contains 6 single. Norma. Pink. Robert Steiger. Brilliant carmine.

Grandeur a merveille. Rosy white. Grand vainqueur. Snow white. Leonidas. Pearl, shaded sky-blue. Orondates. Light blue, with dark stripe.

No. 5.-\$1.50. Contains 3 dble. and 3 sing.

Bouquet orange. Orange. Garrick. Deep blue, shaded violet. Lord Wellington. Light rose. Alba superbissima. Pure white. Alida Jacoba. Clear yellow. Mimosa. Deep violet, to black.

No. 6 .- \$1.00. Contains 6 double.

Red and pink, blue and porcelain, white and rosy white.

No. 7.-\$1.00. Contains 6 single.

Red and pink, blue and porcelain, white and rosy white.

No. 8.-\$1.00. Contains 3 dble. and 3 sing.

Red and pink, blue and porcelain, white and rosy white.

4 Fritillaria Meleagris. 4 Scilla Sibericas.

The above assortments and packages (invariably our selection), upon a remittance, will be mailed or expressed free to any part of the United States.

Hyacinths, when ordered at the hundred prices, to be sent by mail, require an additional remittance of \$1.75 per hundred to prepay postage, but at the single bulb and dozen prices, are mailed or expressed free to any part of the United States.

Tulips.

The Tulip is the most celebrated, popular, brilliant, and has always been prized by florists as the most decorative and showy of spring flowers; and not simply for effect alone, as

EARLY DOUBLE TULIP.

LATE SINGLE TULIP.

EARLY SINGLE TULIP.

many of the choice kinds have a delicacy of pencilling and richness of tinting which excel all other plants. They are of easy culture, both in the conservatory or parlor, and the open garden. They will thrive in almost any soil. A sandy soil enriched with rotted cow-manure is, however, preferable; and being perfectly hardy, they can well claim a prominent rank among hardy bulbs.

Their cultivation is yet so limited, that their real beauty is not generally recognized. A few bulbs scattered here and there produce but little effect, but when planted in masses, or in small groups, they become at once grand and brilliant, and eclipse, in real variety of coloring and picturesque effect, almost any other flower. Our collection is unusally fine, embracing all the choicest varieties.

EARLY DWARF DUC VAN THOLL TULIPS.

The Duc van Tholls are admired for their neat dwarf habit of growth, and brilliant color. They are the earliest of all Tulips, and are especially adapted for pot culture for winter blooming. The best effect is produced by planting in large pots, six, twelve, or more bulbs of the different colors.

For early flowers out of doors, they can also be highly recommended, and produce a pretty effect when planted in masses. The varieties are all single, except the Double Red, which is red, yellow bordered, and very attractive in pots or garden culture.

EARLY SINGLE NAMED TULIPS.

These are well known ornaments of the garden, as well as the green house. Forced in pots, they are very gay and fine; and for bedding in mixtures, or in separate colors and sorts, no spring flower is equal to them in brilliancy.

The late mixed varieties and Gesnerianum, are only for garden culture, for beds and groups

they are very effective.

EARLY DOUBLE NAMED TULIPS.

This class of Double Tulips can be forced in pots; besides, they are a real ornament for the garden, as their large, early, fine-colored flowers and dwarf habit make them very desirable for bedding, and our list comprises all the best named varieties.

The mixed late double tulips are best adapted for planting out in the garden, and will not bear forcing as well as the early varieties; and for a succession, should be planted in every garden.

The Crocus.

As one of the earliest ornaments of the flower garden, it is a universal favorite, being neat, dwarf and compact, and varied in all the essential shades of color for producing harmony of effect. The principal adaptation of this bulb consists in its suitability for planting near the edge of flower borders, etc., so as not to require removal, or in forming lines or edges entirely of such, which, after blooming, may be removed; as the leaves show maturity of growth by fading in color.

The principal months for planting are October, November and December, in ordinary rich garden soil, placing the bulbs about two inches deep, and four to six inches from the edge; each group of six to eight bulbs being planted in its own relative color, or in blended varieties. These improve for some years if not disturbed. To secure a succession of blooms in pots, commence early in the first-named month with six or eight bulbs in each well-drained pot, using the same rich soil, and planting about an inch deep, and, thus planted, place the pots on a surface of ashes, covering them over one inch deep with soil, tan, or dry leaf-mould, until the leaves appear through the soil, when they may be removed to the house.

LILY OF THE VALLEY

Snowdrops.

The pretty Snowdrop, "in habit white and plain," is the first of all flowers to herald the approach of spring. Long before any other flower, it shoots up its slender stem, and displays its white, drooping corols, while the spotless snow still covers the shady recesses of the garden. They flourish well in any soil, and bloom best if not transplanted oftener than every three years. Being dwarf, they should be set near the edge of walks, where they show to advantage. They also flourish well in sand or moss, or in pots or baskets.

Double, 50 cts. per doz.; \$3.00 per 100. Single, 25 cts. per doz.; \$1.50 per 100.

Lucojum æstivum. Large Snow-Flake. Flowers white, with bright green spots, resembling the Snowdrop, but much larger. 10 cents. \$1.00 per dozen.

Lily of the Valley.

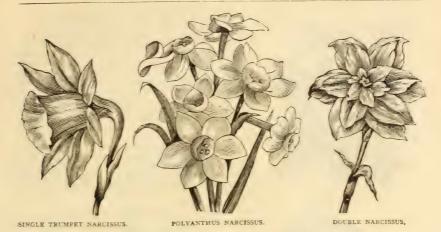

One of the most charming of our spring flowering plants, whose slender stems set with their tiny bells, diffusing a delicious odor, have rendered it a universal favorite. Also largely used for forcing in the winter, for the cut-flower trade. Deliverable after Nov. 1st.

Marcissus.

All the varieties are extremely hardy and popular either as a border or florists' flower. The Single Narcissus is quite an attractive flower, the central cup being of a very different color from the six petals. Some have the petals of a light yellow and the cup orange; others have the petals white and the cup yellow; while the Poet's, or Pheasant's Eye Narcissus is snowy white, with red cup. The Double varieties are very desirable. The well-known Daffodil is of this class. Its true name is Van Sion.

The Polyanthus Narcissus are very attractive and showy flowers, producing on a tall stem large clusters of white and yellow cup-shaped blossoms, and are particularly admired for their sweet jasmine perfume; they contrast finely with the Hyacinth, for garden, pot or glass culture, and require the same treatment. They are now extensively grown as a florist flower,

particularly the Dubius Single and the Double Roman.

DOUBLE ANEMONES.

nemones.

These charming hardy spring flowers having such brilliant colors are becoming better known, and more popular as a garden flower; both double and single are equally desirable, and no garden should be without them. They are well adapted either for pot or border culture, and planted in masses are most effective. They succeed best in a light, rich and well-drained loam. Plant in October or November, or as soon as the ground can be worked in the spring. If planted in the autumn, they should be covered with leaves, straw or long manure on the approach

For pot culture fill with any rich porous compost, and good drainage, planting four roots in a six-inch pot, place in a cold frame, or any moderately cool situation, giving very little water until the plants appear, then remove to the greenhouse or sitting-room window.

DOUBLE ANEMONES.

ANEMONE JAPONICA (Honorine Jobert).

20 cents. \$2.00 per dozen.
One of the most beautiful of the hardy herbaceous plants, and a finer bed of flowers can hardly be imagined than these Japanese Anemones, which commence to open their rich colored single bloom in August, and ever continuing to increase their beauty until the end of autumn. They thrive best

in a light rich, somewhat moist soil, and should not be transplanted more than is necessary to divide them, when they become too thick. A covering of leaves, straw or long manure in the winter, is sufficient for our most severe winters.

Alba. Pure white, yellow centre, and dark eye. Elegans. Carmine, yellow centre, and dark eye. Rosea. Dark rose, shaded pink, yellow centre, and dark eye.

Ranunculus.

For symmetry of form and brilliancy of color in almost all the varieties and hues which are recognized among flowers, the Ranunculus is probably unequalled by any other; for its culture it requires a good depth of light, rich garden soil. The tubers are rather tender, and can be planted out of doors early in the spring; also planted out in the fall, if thoroughly protected from frost, by a covering of straw, leaves, or long manure; and grown in pots, for forcing into early bloom in the greenhouse, if planted in November or December.

Iris (Fleur-de-Lis).

The Iris is a very extensive and beautiful family, commonly known as the Flowering Flag. They are hardy Spring blooming plants, for the open border, with large, handsome, rich and varied colored flowers, in June and July, growing from 18 inches to 2 feet high; of easy culture, thriving in any good garden soil. Plant from September to December. The

first four on our list are perfectly hardy, and require no particular care, except replanting every two or three years; the remaining four are not so hardy; they require protection in the winter, of leaves, straw or long manure, and should not be planted out until after the middle of November, and are excellent pot plants for the house. All the varieties on this list can be forced into early bloom

IRIS KÆMPFERI.

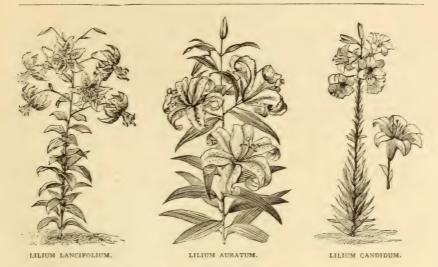

This new Japanese Iris is an excellent addition to the list of hardy herbaceous plants, and should be planted in a somewhat moist situation; during exceedingly dry weather they should be abundantly watered. They are quite distinct from all the other varieties, forming most beautiful groups of handsome colored large flowers, varying in color from pure white to deep blue, veined and mottled. 20 cents each. \$2.00 per dozen.

Herbaceous Pæonies.

This interesting genus contains many magnificent flowering plants. They are tuberous-rooted and quite hardy. To insure a bloom the first season, it is necessary to plant in the autumn, but they can also be planted out in the spring. The following are among the most desirable large flowering varieties, embracing all shades of color, from pure white to a deep crimson; and many are delightfully fragrant. We mail medium-sized roots at the list prices.

Pæonia Arborea (Tree Pæonie). This plant, instead of dying down to the ground every winter, as the herbaceous variety, is a small, hard-wooded shrub. The flower is the same in form as the common variety, but of a light pink or blush color. (Not mailable). \$1.50.

Lilium.

The Lily has always been a favorite flower. Some of the varieties are truly magnificent. The Lilium Auratum is the great Lily from Japan, called the "Golden-banded Lily." This is the king of Lilies. The flower is from eight to twelve inches across, composed of six delicate ivory white petals, each being thickly studded with rich chocolate crimson spots, and having a bright golden band through the centre of each petal, with an exquisite vanillalike perfume. As the bulbs acquire age and strength, the flowers obtain their maximum size and number. Upwards of twelve flowers have been produced on a single stem. It is perfectly hardy, and thrives best in a dry, rather poor garden loam, and should be planted six inches in depth; also admirably adapted for pot culture. The Japan Lilies,—Lilium Lancifolium,—are among the most beautiful and delightfully fragrant, and are suited for either pot or garden culture; their period of blooming is during the months of July and August. Our list will be found to embrace all the best and leading varieties. They are all hardy, and the bulbs can be planted either in the autumn or spring, although autumn is preferable; Candidum and Longiforum Japonicum must be planted in the autumn, as they commence then to grow; and a covering of manure will be found beneficial for all the varieties, but must be removed early in the spring. The ground should be thoroughly drained for Lilies.

GREENHOUSE BULBS AND TUBERS.

Achimenes

Showy flowering greenhouse bulbs, blooming profusely from May to October; are most effective when four or more bulbs are planted in each pot; require light, rich soil, plenty of air, and slightly shaded from the sun.

Named varieties. 30 cts. \$3.00 per dozen. Mixed varieties. 25 cts. \$2.50 per dozen.

Amaryllis.

Splendid flowering bulbs, suitable for greenhouse or for room culture. They should be grown in pots, well drained, in a soil of equal parts of peat, leaf mould and loam; then started in heat, and must have attention after flowering, to ripen off the bulb, by discontinuing to water as the foliage shows signs of dying off; when at rest, store away in a dry, cool place, but leave the bulbs in the pots. They are showly lily-shaped flowers, producing from two to four on a stalk, and bloom early in the spring or later if desired, by starting at a corresponding later period.

Aulica. Dark crimson, shaded green .. \$2.50 Johnsoni. Scarlet, striped with white; very large bloom...... 2.00 Choice Hybrids, imported from Ghent.. 1.25

Vittata. White, striped with bright .\$1,25 Vittata Hybrids, white ground, striped with red..... Vittata Hybrids, red ground, striped

Caladiums.

This class of beautiful variegated foliage plants, margined and delicately traced with various rich colors, and elegantly spotted and mottled, are exceedingly handsome when alone or intermingled with other plants. As a decorative plant, they are unequalled, for the greenhouse or conservatory in the summer months. They require a moist, warm temperature; great care must be taken in their earlier stages of growth, to prevent decay of the tubers, or damping off. The tubers can be best preserved during the winter in charcoal dust in a warm room, and must be started, in the spring, in a warm house or hot-bed with bottom heat; they also do well planted in a shady situation out of doors in June.

25 cents. \$2.50 per dozen.

Argyrites. Small leaf, white and green

spotted.
uher. Green, spotted white and pink. Auber. Green, spotted white and pink. Baron Rothschild. Green, spotted and veined with orange crimson.

Belleymei. White, mid-ribs rose.

Belleymei. Green, mottled with white. Bicolor splendens. Deep crimson, with broad green margin.

Boieldieu. Orange crimson, green margin. Brongniarti. Large green and crimson. Duc de Ratibon. Green, shaded white, with crimson spots.

E. G. Henderson. Green, spotted rose. Enckei. Green, spotted with pink. Endlicherianum. Green, large rose centre. Hercules. Gray centre, and red spots. Houlletti. White, gray and green. Lamartine. Olive green, crimson spots.

Maculata. Green, blotched white.

Meyerbeer. White, mid-ribs red.

Milton. Red veins, gray centre, crimson

spots.

Napoleon III. Green, crimson centre. Newmani. Green, spotted rose.

Reine Victoria. Dark green, spotted with white and crimson.

Rossini. Pale centre, pink ribs, red spots. Rubra maculata. Green, orange spots. Wighti. Light green, crimson and white A complete list will be found in Dreer's

Garden Calendar.

Cyclamen.

Few plants are more showy than the Cyclamen; blooming in the winter and early spring months in the greenhouse, the flowers being singular in shape, of various colors, with beautiful ornamental foliage. The soil should be very light and rich, containing a good part of peat and sand, with well-rotted cow manure. They require frequent watering when in full leaf and blooming.

Gloxinia Crassifolia.

We offer very strong tubers of this, the most satisfactory variety of Gloxinia; strong in nabit, free in bloom and brilliant in color. The colors vary in rich crimson, porcelain, purple and lavender blue, rose and violet belted flowers. Erect, horizontal and pendula varieties; mixed varieties of beautiful colors. 30 cents; \$3.00 per dozen.

Ixia

The best season for planting these beautiful flower-bulbs is during the autumn months, for early spring blooming; being small, they are most effective when planted in stores of three, four, or six in each pot, of four or six inches in diameter; they are too small to grow as single specimens.

Named varieties. 10 ets.; per doz., \$1.00. | Mixed varieties 5 cts.; per doz., 50 cts.

OXALIS FLORIBUNDA

ORMTHOGALUM AUREUM.

Oxalis

These are profuse bloomers, and very attractive in the greenhouse or conservatory during the winter. Plant three or four bulbs in a pot; the pots should be kept near the class to prevent the foliage from growing too long, and require frequent watering while growing.

FRORISTS' AND AMATRURS' REQUISITES.

CUT FLOWERS, IMMORTELLES, GRASSES, ETC.

Bouquets of Cut Flowers, etc.—Among other evidences of refinement and culture is the increasing taste and demand for natural flowers, for the decoration of dinner and supper tables, churches, weddings, funerals, etc. Flowers are acceptable and suitable for every occasion. We having the facilities are prepared to execute orders for every kind of floral device or decoration, having daily a supply at the store. They can be packed so as to carry safely for one or two days' journey by express. In sending your orders mention the latest time that will do to receive the flowers in your town; often we receive the orders after the time they are wanted, or after the express has gone, and then have no opportunity to send in time, hence the disappointment to those sending their orders. The prices vary according to the scarcity of flowers and the season, which are always more expensive during the holidays. Prices given when desired on any particular design.

FRENCH IMMORTELLES, OR EVERLASTING FLOWERS.

In original bunches as imported, 60 cts. Bunches of assorted colors, 75 cts. The following are the colors we import: yellow, green, orange-red, black, spotted, white, carnation-red, crimson, blue, and violet.

Bouquets and other designs made to order of Immortelles, Grasses, and Everlasting Flowers, combined or separate, as may be desired; prices will be given on application.

Ornamental Grasses and Everlasting Flowers, of natural colors or dyed-have become almost indispensable articles for Florists' use, as well as amateurs in bouquet-making and arranging fancy and ornamental designs for Church, House and Parlor decora-tions. We offer the following varieties, put up in small bunches all of one color, natural or dyed, as may be desired. Prices for large quantities, or by the pound, given on application.

Pampas Grass Plumes, of a beautiful silvery appearance, 12 to 30 inches long, exclusive of stem, retaining their beauty for years. Ours are the finest California Plumes. They can be sent by mail with safety. When received they should be gently shaden over the hot air of a furnace register, or in front of a fire for a few moments, which will develop their beauty.

..each from 5.00 to 20.00 Terra Cotta Fern Stands for glass shades, which make beautiful small terneries, and are much in demand. The stand is made with a rim for the shade to

Rustic, resembling wood as per cut, for a 111/2 inch shade. 82 50.

Rustic pattern, very ornamental, 11 inch shade. \$2.00.

Rustic ornamented, 93/4 inch shade. \$1.50. Rustic 7 to 9 inch shades, from 75 cts. to \$1.00.

We also have on hand a fine assortment of different sizes and styles, very handsomely ornamented; ranging in price from \$1.00 to \$3.50.

Glass shades for the above according to size of Fern

We also fill the above Fern Dishes with suitable plants from \$1 to \$3, according to size.

Wardian Cases.—Made in the best manner and style, of biack walnut. Very popular for the growing of plants, ferns, etc., during the winter. The plants being under glass are protected from dust, and require but butter are or water. A mayable tray, lined with zinc, contains the pots, or earth; a perfect security against soiling carpets with dirty water.

against sening carpets with dirty water.

Size, 4 ft. lingh, 2½ feet long, and 25 in. wide, with legs which can be disconnected, and the whole makes but a small package for transportation. \$25.90.

Size, 15 by 29 inches, without feet. \$15.00.

Size, 12 by 12 inches, without feet and immovable tray. \$5.00.

Large Hexagon Shape, and beautiful revolving stand. \$25.00.

Wooden Plant Stands .- A useful and cheap folding-stand for arranging plants both in and out doors. Neatly made and painted green. The frame folds together, making a compact and convenient article for transportation and storage. 36 in. high. 40 in. wide, 4 shelves.

Wire Hanging Baskets .- Galvanized of various sizes, each from 25 to 75 cts.

Muller's Vine Fastener, a cheap and durable fastener, with spiral spring and a cork holder, in

Rustic Hanging Baskets, 6, 9, 10 and 12-inch bowls, each \$1.25, \$1.59, \$2.00 and \$2.50. Rustic Plant Stands, each from \$2.50 to \$8.00.

Rustic Chairs and Settees, each from \$5 to \$10.

Expanding Adjustable Flower Pot-Covers—An elegant and convenient article for evering Flower Pots. Black Walnut, for 5, 6, 7 and 8-inch pot, each 20, 25, 30 and 35 cents, a so made of other wood.

IRON FLOWER-POT BRACKETS.

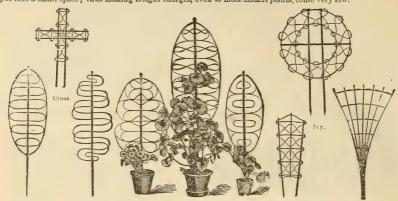

Of beautiful designs and various sizes, and are made to swing, so that they can be easily moved out of the way of the curtain, as per brackets in illustration.

Flower-p t shelves and brackets, shelf 3 feet long as per shelf illustration, each \$1.50 and \$2.50.

WOODEN TRELLISES FOR FLOWER-POTS AND GARDEN.
THESE trellises are in all cases made of reeds painted green, instead of wire. They retain their shape and form better, are much lighter and equally durable. From their peculiar shape, large numbers can be put into a small space; thus making freight charges, even to most distant points, come very low.

AMERICAN IMPROVED BRASS GARDEN SYRINGES, ETC.

New Bellows Syringe.—An invention for showering plants with insect-killing liquids—or clear water to cleanse house plants from dust and keep the foliage in a healthy condition; operating the same way as the atomizer or spray-sprinklers. The liquid is put into the brass globe and the bellows worked; a fine spray issues in a copious stream that is easy to reach every part of the plant. \$3.50.

Elastic Plant Sprinkler.—This is a very convenient article—and much preferred by the ladies, as it is so easily worked by pressing the rubber together with the hand—for sprinkling Bouquets and Window-Gardening Plants, to cleanse their foliage and keep them in a healthy growing condition, as well as for dampening clothes. It is made of Rubber, and brass perforated, detachable top. \$1.00; by mail, postpaid, \$1.25.

Hydronette, or Fountain Pump.—The improved double-action pump for watering and syringing plants; not liable to get out of order, being made of brass, with India-rubber Hose to draw the water, and throws a continuous stream. \$8.00.

Excelsior Pump and Portable Fire-Engine.—This compact, portable Engine can be used for all horticultural purposes, etc. All its working-parts are of brass, and of easy access to the valves, which can be cleansed at any time. It will draw the water from a stream, tank, or pail near by or at a distance, is of simple construction and easily worked, throwing a continuous stream fifty feet. Price, \$9.00. Extra hose, if required, at 15 cents per foot, and the extra attachments for applying the same, 50 cents.

Aquarius Force Pump.—A powerful small pump, throws eight gallons of water per minute from fifty to sixty feet, drawing the water from a stream, tank, or will lift it from a depth of twenty feet. \$9.00.

Watering-Pots, Japanned Green.—The French pattern is considered an improvement over the old style of Watering-Pots. It being oval, and the handle extending from the side to the opposite side on top, makes it convenient to handle, it can be used and tilted with one hand to any desired angle without any extra exertion. We have these pots made of extra heavy tin with an iron-hooped base, to protect the sides and bottom from being indented, with an extra spont and two copper-faced roses, fine and coarse, and japanned inside and outside; the spout can be detached, and the rose or sprinkler put on for watering seedlings and fine plants.

4 quart ...\$2.00. 6 quart\$2.50. 8 quart\$3.50. 12 quart\$3.50. We also have made especially for our trade the Round Watering-Pot of extra heavy tin, and iron-hooped bottom, with two copper-faced roses, fine and coarse, inananned inside and outside.

tom, with two copper-faced roses, fine and corrse, Japanned inside and outside.

6 quart.....\$2.50. 8 quart.....\$3.00. 12 quart.....\$3.50.

16 quart......\$4.00.

Common tin round Watering-Pots, i-panned inside and outside.

4 quart.....\$1.25.

8 quart......\$1.50.

Sulphur Bellows, or Floral and Vintage Duster, for the extermination of bugs, worms, insects, and mildew upon grape-vines, etc. By the use of this implement the flour of sulphur can be evenly distributed over every part of the affected plant. 3 sizes, \$1.00, \$2.00 and \$3.00 each.

The Eureka Fumigator .- After many unsuccessful attempts, we have found an effectual apparatus for the funigating of greenhouses, etc., doing away with the un-pleasant duty of being smoked almost to death by the old mode, as they required constant attention to prevent the tobacco stems from burning to a blaze, and destroying the plants

in getting rid of the pests that infest them

In getting rid of the pests that lines, then. This apparatus, made of sheet-iron, is of simple construction, and not liable to get out of order. When once lit, it is self-acting, and may be left in the house with perfect safety, as flaring is an impossibility, and setting anything on fire out of the question, while all the material is completely consumed without waste and given off in a dense snoke, filling a house in a short time, thus insuring the entire destruction of insect life.

It can be used for the following purposes: Greenhouses, Conservatories, Pils, Primes, Hospitals, Ships, Poultry Houses, etc.; for destroying vermin or purifying rooms. Direc-

tions for use sent with each apparatus.

No. 1. Height 12 in., diameter at top, 5 in. Suitable for a house 10x20 ft. Holds 1/2-peck of stemsPrice \$2 00

No. 2. Height 16 in., diameter at top, 7 in. Suitable for a house 12x40 ft. Holds 1 peck of stems... Price \$3 00 15x100 ft. No. 3. 20 6 5 (10) Made of extra heavy iron, galvanized, will last a long time

INSECT DESTROYERS AND FERTILIZERS.

Combined Soaps, Whale Oil as the body, with Carbolic Acid, Hellebere, Tohacco, Guano, etc. One of the most effective compounds for destroying insects infesting plants, vines, and trees. Directions for use, with each can, ½-lb. can, 20 cts.; 1 lb., 30 cts. Each, by mail—½-lb. 30 cts., and lb. can 50 cts. each.

Gishurst's Compound, for the destruction of the Green, Brown, and Black Fly, Mildew, Thrip,

By mail, \$1. er box.

Bridgeford's Antiseptic Liquid, for the removal of all parasites, lichens, and insects injurious

Bridgetord's Antiseptic Liquid, for the removal of all parasites, inchens, and insects injurious to plants, trees, shrubs, vines, etc. In bottles, with directions, of 80 cts, and 52.5 each. (Not mailable.)

Grafting Wax, of first quality, put up in convenient rolls for grafting; also good for cuts and bruises on trees, which causes them to heal up rapidly. Put up, with directions for use, 1 lb., 40 cts.; ½-lb., 25 cts.; and ½-lb., 15 cts. By mail. 16 cents per lb., or fraction thereof, additional for postage.

Bowker's Ammoniated Food for Flowers.—A fertilizer made especially for plants grown in the conservatory, house, or garden. Clean, free from offensive odor, largely solube in water, producing healthy plants free from vermin, early and abundant flowers, to which it imparts a rick and brilliant hue. Full directions with each because the conservation. tions with each bag or package. Pects.; 10 lbs., \$1.25; and 50 lbs., \$3.50 Per package, 35 cts., by mail, 50 cts.; dozen packages, \$4; bags of 5 lbs., 75

Peruvian Guano (Pure).—For pot plants and garden purposes. When used as a liquid manure its effect is almost immediate. Put up in boxes, with directions, 15 cts. (by mail, 40 cts.), 30 cts. (by mail, 85 cts.), and 50 cts. each. The last size box is not mailable. Per sack of 200 lbs., \$8.00; per ton, \$70.00.

AQUILEGIAS. (Rocky Mountain Columbines.)

Among hardy perennial plants, these may be ranked as the finest, and deserving of cultivation in every garden.

CHRYSANTHA (Golden Spurred). Height 4 feet, producing freely an abundance of bright

golden-yellow flowers. Per packet, 10 cents.

CERULEA. The flowers measure 3 inches in diameter; the outer five petals, as well as the long spurs, are of a beautiful violet blue; the inner petals are pure white, forming a pleasing contrast. Per packet, 10 cents.

BALSAMS.

Double White Perfection. Pure white thoroughly double immense round flowers, very desirable for bouquets. Per packet, 25 cents. \$3 per ounce, net.

CINERARIA FLORE PLENO. (New Double Cineraria.)

A large percentage of this variety produces double flowers of good colors and styles. The singles are of the finest. Recommended for cut flowers. Per packet, 50 cents. CINERARIA HYBRIDA GRANDIFLORA. The finest large-flowering single varieties in existence. Choice mixed colors of the dwarf and tall, each, per packet, 50 ceuts.

APPLE-SCENTED GERANIUM. (Pelargonium Odoratissimum.)

This delightfully fragrant and favorite variety can only be grown from seed, to form a fine plant. We have made a specialty of growing this variety, and offer fresh seed. Soak the seed twelve hours, and sow in light soil, keeping them moist until they germinate. Per packet, 25 cents; five packets for one dollar.

New Zonale Geranium. Saved from our choice collection of the newest and best named

varieties. Per packet, 20 cents.

NEW ZONALE VARIEGATED GERANIUM. Saved from a celebrated collection of golden and bronze-colored varieties. Per packet, 50 cents.

OUR SUPERB DOUBLE HOLLYHOCKS

Are the admiration of all visitors. Seed saved from the finest double varieties. Seed sown early in autumn will produce plants for blooming next summer. Assorted colors, mixed, per packet, 10 cents. Extra double, pure white, per packet, 20 cents.

DREER'S PREMIUM PANSY SEED. (Viola Tricolor Maxima.)

To insure large full blooms, it is necessary to sow in the autumn; full directions will accompany each paper of seed. Per packet, 25 cents; five packets for \$1. \$10 per ounce, net. Pansy, Snow Queen. Satiny white, with yellow in the centre. Per packet, 25 cents.

PETUNIAS.

DREER'S EXTRA CHOICE. Mottled white and purple, and white and crimson varieties.

We consider this the finest strain of petunias; our collection has always taken the first premium at the Pennsylvania Horticultural Society's Exhibitions. Per packet, 20 cents; six packets for \$1; \$10 per ounce, net.

DREER'S DOUBLE HYBRIDIZED. Fecundated with the greatest care, from our very choice

collection, and a fair percentage will prove double. Per packet, 25 cents.

TACSONIA INSIGNIS.

This splendid novelty is remarkable for its handsome foliage and magnificent flowers; of robust, free-flowering habit, a greenhouse evergreen climber, flowers measuring from 6 to 8 inches across, and hang in festoons on long pendant stalks, color crimson, purple shaded, whilst the mouth of the tube is adorned with incurved fringe filaments, which are blue mottled with white. Per packet, 50 cents.

VERBENAS.

DREER'S STRIPED AMERICAN. Brilliant colors, striped carnation-like, with rose, lilac and purple, on various colored grounds. Seed saved from our splendid collection. Per packet, 25 cents.

EXTRA CHOICE HYBRID VARIETIES. Selected from our newest and finest varieties, and richest colors, which occupied over an acre of ground, and was the admiration of all visitors this season. Per packet, 20 cents. \$4 per ounce, net.
